

# the red book

## future aircraft values (fav) 2010-2030

Using the proprietary **mba** model, Future Aircraft Values (FAV) provides a trusted assessment of aircraft values forecasted for the next 20 years. It also includes a current market analysis for each aircraft, as well as vital statistics and economic summaries.

The FAV red books are available as an annual subscription and include delivery of the books at the beginning of the calendar year, as well as a mid-year update of values. All issued publications include a CD-ROM of excel files for each listed aircraft.

key features:

- current market prices
- current base values
- future base values
- current market analysis
- vital statistics
- value trends
- value comparisons

available publications covering modern aircraft currently in service:  
jet transport, cargo aircraft and regional aircraft

### Combination Subscription

Includes:

- the red book
- FAV Jet Transport
- FAV - Cargo Aircraft
- FAV - Regional Aircraft
- Unlimited access to eFAV

### eFAV can provide you with the tools to:

*Build, customize and track aircraft portfolios*

*Forecast adjusted future values*

*Calculate weight- adjusted aircraft values*

*Incorporate mba gross takeoff weight adjustments*

*Forecast and compare mba values against user input values*

*Select alternate inflation rates for the forecast period*

*Graphically compare value results*

## eFAV online valuation tool

An on-line version of mba's authoritative database of Current Base and Market Values and Forecasted Future Values. The eFAV contains portfolio value tracking abilities along with graphic and value modeling.

(see reverse for pricing)

Take eFAV for a test flight:
